

Stuckelemente aus Gips

the 1990s, the incidence of *S. flexneri* infections in the United Kingdom has increased, and the incidence of *S. flexneri* infection in the United States has increased in the 1980s and 1990s [10, 11]. In the United Kingdom, *S. flexneri* is the most common serotype of *S. flexneri* isolated from patients with shigellosis, followed by *S. flexneri* serotype 3 [12].

There is a paucity of data on the epidemiology of *S. flexneri* infection in the United Kingdom. In the United States, *S. flexneri* is the most common serotype of *S. flexneri* isolated from patients with shigellosis, followed by *S. flexneri* serotype 3 [13]. In the United Kingdom, *S. flexneri* is the most common serotype of *S. flexneri* isolated from patients with shigellosis, followed by *S. flexneri* serotype 3 [12].

The purpose of this study was to determine the prevalence of *S. flexneri* infection in the United Kingdom. The study was conducted in the United Kingdom, and the results of the study are presented in this paper. The study was conducted in the United Kingdom, and the results of the study are presented in this paper. The study was conducted in the United Kingdom, and the results of the study are presented in this paper.

Stuckleisten sind gerundete Eckteile zwischen der Wand und der Decke oder zwischen den Wänden. Stuckleisten waren vor allem in der Architektur des 18. und 19. Jahrhunderts beliebt.

Dank der Nutzung der neuartigen Technologie des leichten armierten Gipses sind unsere Stuckleisten leicht, lang (bis zu 4 m) und beständig. Diese neue Technologie ermöglicht eine einfache Montage, einen einfachen Transport und eine hohe Festigkeit.

## Deckenkassetten

Kassetten gehören zu den dekorativen Teilen von Decken, Gewölben und Kuppeln. Die Kassettendecken sind sowohl in antiken als auch neuzeitigen repräsentativen Gebäuden zu finden. Unsere Kassetten aus Gipsstuck, in der klassischen Quadratform mit Verzierungen, erinnern an die Ornamentik der Renaissance.

Das Portal ist eine dekorative Umrundung der Eingangsöffnung mit Elementen der Architektur und Bildhauerei. An beiden Seiten des Eingangs befinden sich Pfeiler, Säulen oder Wandpfeiler, die den Türsturz oder einen Bogen halten. Die Supraporte ist eine Art des dekorativen Türsturzes, der oft mit einer bildhauerischen Stuckverzierung ausgefüllt ist. Wir bieten viele Muster der Supraporten in verschiedenen Stilrichtungen - klassisch, Renaissance, Barock oder auch Rokoko. Die Supraporten harmonisieren ideal mit Wandpfeilern und verleihen so jedem Eingang einen einzigartigen Charakter.

Die Säulen sind das charakteristischste Detail in der ganzen Geschichte der Architektur. Die Proportionen, die Form und die Verzierungen der Säulen haben sich in den einzelnen Epochen und Stilrichtungen verändert. Unsere Säulen wurden nach den Mustern von Giacomo Vignoli, einem Architekten der Renaissance entworfen.

Wandpfeiler sind flache Pfeiler an der Wand, die hauptsächlich eine dekorative Rolle spielen, die aber auch zur Teilung der Wandoberfläche oder der Umrandung von Türen und Fenstern dienen.  
Wandpfeiler sind mit Wandpaneelen und Wandsystemen, mit Stuckleisten und Bögen kombinierbar.

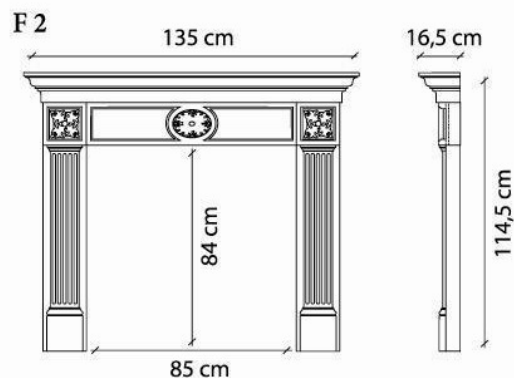

# Kaminportale

**F 1**  
155,5/119,5/29 cm

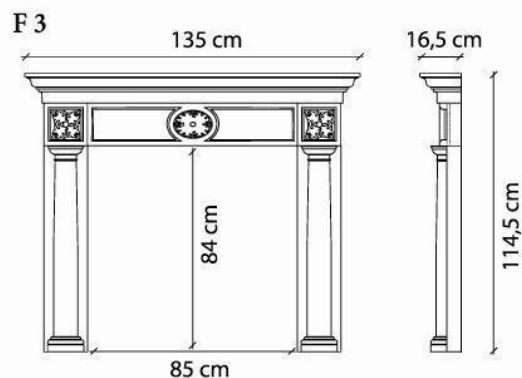

Die Kamine sind oftmals die dekorativsten Elemente der Innenausstattung. Unsere Kaminverkleidungen werden aus Gips oder einem Konglomerat mit einer erhöhten Härte gefertigt. Erhältlich sind sie für Kamine sowohl mit einer offenen als auch mit einer geschlossenen Feuerstelle. Viele der produzierten Muster stammen ursprünglich aus niederschlesischen Mietshäusern und Schlössern. Dank der großen Erfahrung auf dem Gebiet der Konservierung können wir das Aussehen alter Kamine rekonstruieren und Sonderanfertigungen der Kaminverkleidungen herstellen.
